

**IMPORTANT ANNOUNCEMENT
MANDATORY WATER USE RESTRICTIONS**

AWSC is initiating Stage 2 of its Drought Contingency Plan due to high demand within the system which is approaching the limit of system supply. Under this stage of the Plan, outdoor watering is prohibited between the hours of 5:00 AM and 8:00 AM, and from 10:00 AM to 6:00 PM daily. Residential users are allowed to irrigate on Tue. and Sat. for addresses ending in even numbers. For odd ending addresses, Wed. and Sun. All Schools, Commercial and other users are allowed to irrigate on Mon. and Thurs.

We urge all AWSC customers to only water landscape ONE day per week, and to delay the installation of any new landscape. Use of soaker hoses for foundations, drip systems and spot watering with hoses is permitted at any time. Most established landscape can survive with one watering per week.

We appreciate your co-operation in this conservation effort. Your compliance does matter!

If you have any questions, please contact our office at 940-464-7713.

These water use restrictions are effective as of July 15, 2011. Continue to check your monthly bill for further restriction notices.
